**THINK BEYOND
THE BOARD**

THE WAVEJET STORY

WaveJet is a patented personal water propulsion (PWP) system designed for use in a range of personal watercraft. Capable of 20 pounds of thrust, WaveJet has a continuous run-time of up to 60 minutes and recharges in a standard wall socket. Operated from a wireless wrist controller, the WaveJet system leaves your hands and feet free to ride your board in a normal fashion. You can move faster and conserve strength for when you need it most.

WaveJet's revolutionary, performance-enhancing technology lets you go where no one else can go and do things no one else can do. Surfers spend more time riding. Kayakers have a power source beyond their paddles. SUPers get up and running immediately and push the limits of their board's capabilities. Lifeguards save more lives. WaveJet makes the most out of the time you spend in water and puts you where the action is. Fast. WaveJet lets you break free.

TECHNOLOGY

PATENTED PERSONAL WATER PROPULSION TECHNOLOGY

BOARD & POD MOUNTING RING

WaveJet is a complete water propulsion system that includes your board, WaveJet power pod, blank pod for non-powered use, wrist controller, and charging station that lets you refresh the battery via a standard wall socket or car lighter.

WaveJet's twin jet motors are powered by lithium ion batteries and controlled remotely by a simple on-off button that utilizes Seatooth® technology worn on the wrist or arm. If you become separated from your board, the Seatooth® communication disconnects with the wrist controller. This is recognized by the motor which will then shut down automatically.

WaveJet provides up to 60 minutes of continuous run-time, translating into hours of surfing or paddling. WaveJet is both extremely simple to use and incredibly effective at catching waves and helping paddlers to harness greater power in the water, enhancing their experience.

WAVEJET PRODUCTS

Surfboards (Long and Short)

WaveJet surfboards are developed by leading industry shapers and come in a number of sizes. WaveJet surfboards assist surfers in paddling out, connecting sections, surfing on smaller days when everyone else stays home and paddling into big waves without a tow-in.

WRIST CONTROLLER

SUP

WaveJet stand up paddleboards are developed by leading industry shapers, Steve Walden of Walden Surfboards and Todd Caranto of Pau Hana Surf Supply, and are available in a number of sizes. WaveJet SUPs assist paddlers in moving on the fastest of currents, catching waves, or touring in any type of condition.

Rescue Board

WaveJet rescue boards have been tested nationally and can enable lifeguards to reach, rescue and return in half the time of a non-powered board.

Additional Applications

Additional WaveJet products in development include kayaks, inflatables, DPVs and small boats.

TEAM WAVEJET

GARRETT McNAMARA

Garrett McNamara's life mission is to catch the biggest and best waves on the planet. He is one of only two human beings ever to ride tsunami waves generated by calving glaciers in Alaska. He has gone deeper in

the barrel than anyone has ever gone at Teahupoo. And the list goes on. Garrett started stand up paddle surfing, taking SUPs big-wave venues like Waimea, Puerto Escondido, even Mavericks. In June of 2009, the ISA invited Garrett to compete in the World Stand Up Paddle Surfing Championship. Garrett was named a Global Brand Ambassador for WaveJet in early 2011. In early 2012, Guinness World Records entered McNamara into the book for surfing the largest wave ever, surfing a 78-foot wave at Nazaré, Portugal.

CORY LOPEZ

Cory Lopez is a prodigious goofy-footer known for his fearless tube riding at venues like Teahupoo and Pipeline, as well as his innovative, high-flying aerials above the wave.

Cory's major wins include: three-time X Games Gold Medalist; U.S. Open of Surfing Champion; Billabong Pro Tahiti Champion; Globe SI Pro Champion; Gold & Silver Medalist at the Olympic (IOC) recognized ISA World Championships and numerous top finishes around the world. A two-time Surfer Mag "Guts for Glory" winner for his exploits at Teahupoo, Tahiti, Cory has been ranked as high as #1 on the ASP World Tour, with a final season best of #3. An entrepreneur, Lopez is owner of Nekton Surf Shop in his hometown of Indian Rocks Beach, Florida.

JESSE BILLAUER

Jesse Billauer is a professional surfer and inspirational speaker. A California native, Jesse suffered a surfing accident in 1996 that resulted in a full spinal cord injury, leaving him a quadriplegic. Unwilling to

be kept down by this challenge, Jesse founded the non-profit organization, Life Rolls On and has gone on to fulfill his dream as a professional surfer while also working with and inspiring athletes all over the world. With the help of WaveJet technology, Jesse has begun taking his surfing to a new level of independence and achievement. Jesse currently serves as Director of National Outreach for Life Rolls On, now part of the Christopher and Dana Reeve Foundation, and resides in Southern California.

MIKE RAILLEY - CEO

In the late 90s, Mike Railey tried his hand at tow-in surfing, and wondered if it was possible to miniaturize the jet drive technology used in personal watercraft to make it fit ordinary surfboards. Powered boards had been around since the 60s, but had always been too heavy for any kind of real performance.

Mike believed he had a better solution and began experimenting with lightweight propulsion. He created numerous prototypes and applied for a patent that was published in 2007. Since then, WaveJet has been adopted by top surfers, industry leaders and lifeguards, and has gotten rave reviews. Launching in surfboards, bodyboards, rescue boards and SUPs in late 2012, WaveJet is poised to revolutionize personal watercraft of all kinds.

MICHAEL VLOCK

Chairman of WaveJet Propulsion, Michael Vlock manages investments for the Pritzker/Vlock family office. The enterprise owns and manages a broad portfolio of public equities, consumer, biotech, industrial and medical equipment and technology businesses, several venture funds, and real estate.

He also has substantial ownership interest in Global Hyatt Corporation and private equity interests in TransUnion LLC, Triton Container International Corporation and the Marmon Group. Mr. Vlock and his wife, Karen Pritzker, are involved in numerous national philanthropic efforts individually and through their family foundation with emphasis on literacy, education, medicine, theatre and land preservation.
